EMERGENCY TARPING

Cover Safe will provide protection to roofs and structures following damage and during repair and construction work. The durability, strength, and waterproof features along with being lightweight and easy to handle make this the choice for residential, commercial, and industrial roofing jobs.

- Eliminates water pooling
- Lightweight and no ropes required
- Can stay installed for up to 12 months
- Quick and easy to install
- No wind noise when installed
- No secondary damage to fences, gutters etc.
- Still able to collect tank water from roof
- Fits tin, tiles, shingles and asbestos roofing
- Contours to the roof shape
- Can be used on frame work
- Ideal for suspected flood areas when sand bagging

Other Services

- We also manufacture roof tarps.
